

The FCC should not implement any proposal that would lessen Indiana's Telephone Privacy law protections.

Indiana's Telephone Privacy law has improved your time at home. No more annoying phone calls late evenings to wake up the kids.

Indiana's law has been effective, I used to receive 4 calls per night, now I only receive one per month. I mentioned to a phone spammer that I was on the list and he promptly apologized and assured he and his employer would not contact me again.

Please leave the Indiana's Telephone Privacy law as it stands and get on to wokring on other issues. Please don't waste taxpayers time on this any more.
